Subject: Talking points re-write
Mary Ann

I made changes to my parts in the attached.

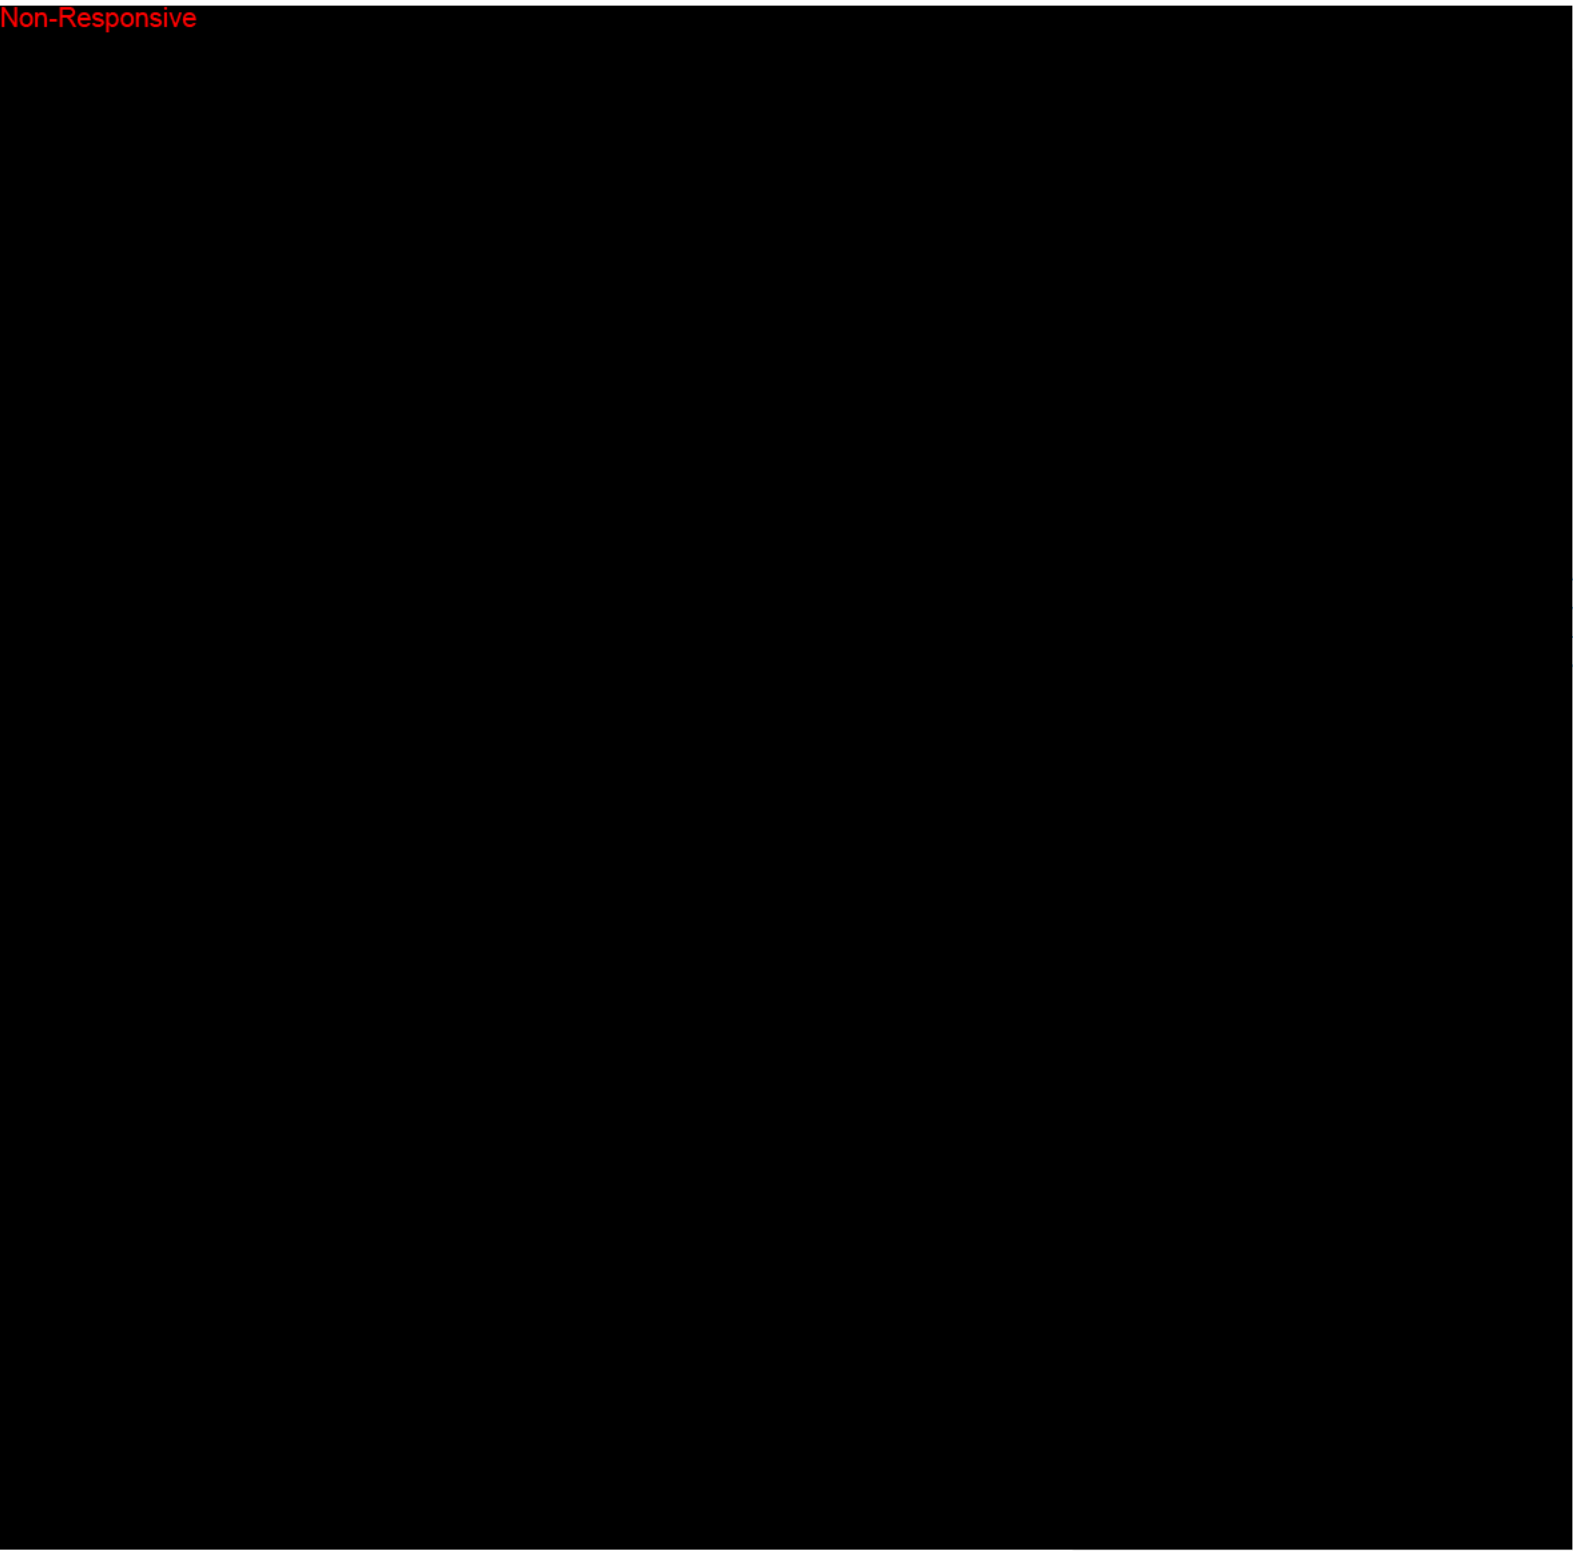

Please make your changes in the same document if you have not already started. If you have, then just send the document you changed to me and I will incorporate together.

Please look at what I wrote for Vickery – I think I captured what you said for the “procedure change”, and look at the Area School discussion – you were right, all I found was radiation – for some reason I thought they did soil (as a background, or drinking water)

Thanks,

Steve Wolfe
